

## **SUSTAINABLE BUSINESS PRACTICES AND THE PROTECTION OF NATURAL RESOURCES.**

- We do our best to act environmentally consciously.
- We inform our friends, family and guests to do the same
- We diligently take into considerations tips and solutions for responsible handling of natural resources and efficient energy use

We are aware that such handling is first and foremost valuable for the environment. We don't need to do much to act more responsibly to the environment. We don't have to say no to leisure and other things we enjoy to do. For the most part, those are simple and barely noticeable acts. But with a few simple precautions, we can collaboratively make this world a better place to live and leave it in equally good shape to our descendants.

We ask you to read and consider our Environmental attempts. Namely, awareness of our guests is our duty in obtaining the environmental sign. We will be glad to see you put our propositions into action. As well we are happy to hear all of your further suggestions and comments.

- **TAP WATER IS SAFE TO DRINK**

Tap water is free and plastic-free!

- **WE SEPARATE WASTE ACCORDINGLY**

We always separate the waste to the designated bins. Never leave the waste in nature or flush it down the toilet. Prevent pollution of the environment and drinking water. In your bathroom is a bin for mixed waste. All other waste (paper, glass, metal...) are collected by the housekeeper.

- **ALWAYS SEPARATE THE WASTE TO ITS DESIGNATED BINS.**

- **REDUCE PLASTIC USE AND REDUCE PAPER CONSUMPTION**

Plastic presents a great threat to the environment and humanity. Plastic particles intrude in human and animal bodies and gravely endanger our health. **Avoid using single-use plastic.**

- **TURN OFF THE LIGHTS**

- **REDUCE CARBON FOOTPRINT**

**We always close the doors and windows behind us.** We recommend airing the rooms in the morning and evening, closing the windows in the warmer months and preventing heat to enter. By doing so, the rooms keep cool, fresh with no need for extra cooling by AC and furthermore reducing carbon footprint.

- **EXPLORE THE ENVIRONMENT BY GREEN MOBILITY**

Information for bicycle and e-scooter rental or rental options is available at reception.

- **REDUCE DETERGENT USE**

Hotels all around the world use tons of detergents and millions of litres of water daily to wash single-used towels and linen.

We change the towels and linen in the room after each check-out, each second day of your stay or when specifically requested
